

| DATI CARATTERISTICHI                        |                      |
|---------------------------------------------|----------------------|
| Technical data                              |                      |
| POTENZA                                     | 243 kW (330 CV)      |
| Power                                       | 1800 RPM             |
| N° CILINDRI                                 | 6 in line            |
| Cylinder number                             | 3 in-line 6          |
| ALESAGGIO CORSA                             | 135x150              |
| Bore x stroke                               |                      |
| CILINDRATA TOTALE                           | 12,9 dm <sup>3</sup> |
| Total displacement                          |                      |
| PESO A SECCO MOTORE BASE                    | 1320 Kg              |
| Weight basic engine dry                     |                      |
| CARATTERISTICHE GENERALI (vedi disegno)     |                      |
| Generic technical data (see drawing)        | 8047056              |
| SCHEMA ELETTRICO (vedi disegno)             |                      |
| Wiring layout (see drawing)                 | 8034449              |
| SCHEMA CIRCUITO COMBUSTIBILE (vedi disegno) |                      |
| Fuel circuit layout (see drawing)           | 8030506              |
| SCHEMA CIRCUITO OLIO (vedi disegno)         |                      |
| Oil circuit layout (see drawing)            | 8030507              |
| SCHEMA CIRCUITO ACQUA (vedi disegno)        |                      |
|                                             | 8047062              |
